

Recognized vaccinations

The AXA supplementary outpatient insurance contributes to the costs of preventive vaccinations that are medically recognized in Switzerland but not covered by mandatory health insurance.

As of: February 19, 2025

The costs of the following vaccinations are covered by the AXA supplementary outpatient insurance:

- Yellow fever
- Rabies
- Japanese encephalitis
- Typhoid fever (typhus abdominalis)
- Cholera
- Herpes zoster (shingles)
- Rotavirus gastroenteritis

The costs of the following vaccinations are covered by basic insurance (minus excess and deductible):

- Tick vaccination (tick borne encephalitis)
- Measles, mumps, rubella (MMR)
- Chickenpox (varicella)
- Diphtheria (every 10 years)
- Tetanus (every 10 years)
- Whooping cough (pertussis)
- Haemophilus influenzae type B
- Pneumococcal infections
- Poliomyelitis (polio)
- Hepatitis B
- Hepatitis A for special risk groups
- Influenza
- Annual flu vaccination for persons aged 65 and above and individuals with an increased risk of complications in the event of flu
- Cervical cancer (human papilloma virus, HPV). If vaccination takes place as part of the cantonal vaccination programs, it is free of charge for all persons aged 11 to 26. Outside of the cantonal vaccination programs, the costs of HPV vaccination for people aged 11 to 26 are covered by mandatory health insurance – subject to excess and deductible.
