Management report

Introduction

With 1.9 million clients, AXA is the overall market leader in Switzerland with a market share of approximately 11% in total, 13% in property & casualty and 8% in life & savings. AXA insures around 40% of companies in Switzerland and is positioned as a reliable and innovative partner offering high quality services to its customers. The company offers a broad range of products in core business areas (e.g. motor, property, liability and workers' compensation), specialty lines (e.g. transport and credit & surety), individual life, health care, collective foundations and autonomous markets of the occupational benefits insurance. AXA has been providing comprehensive financial protection to its customers since 1875.

AXA brand awareness is among the highest in the market, supported by a track record in developing and launching innovative insurance solutions. Moreover, AXA is the only Swiss insurance company with its own accident research centre and has been promoting safety in road traffic for many years.

AXA Life Ltd is a member of AXA Group, which is a leading global insurance brand. The company has strengthened its position continuously over the last few years by improving cost efficiency and focusing on sustainable and profitable growth. Its large customer base in both the retail and the commercial segments, its remarkable market penetration, and the fact that it has the largest and densest distribution network, have been major competitive advantages. Offers, services and processes are underpinned by exceptional expertise, notably in asset management, pricing, risk management and claims management.

Current market situation

In the past year, the Swiss economy was caught in a field of tension between forces acting in opposite directions. On the one hand, the economy experienced a boost in spring due to the removal of pandemic related protective measures in many countries. On the other hand, the Ukraine war increased energy prices, which fuelled inflation. In addition, ongoing supply chain issues, the pandemic situation in China and increasing labour shortages additionally intensified this price development. Nevertheless, the inflation remained clearly below the level of many other countries.

In context of strongly rising inflation rates, the monetary tightening course of many central banks accelerated significantly during the year. After a long phase of very low or even negative base rates, these have been raised very rapidly and, in some cases, significantly all over the world in the recent months.

The life insurance market declined only slightly by 0.5% in 2022. This decline is mainly explained by the group life business (-1.9%), where single premiums fell by 1.6% and annual premiums by 2.2%. These effects are due to the more cautious underwriting of full insurance solutions across the industry and the trend towards semi-autonomous solutions. Thanks to the growth of the unit-linked business the individual life market developed positively (+2.5%). An increase was recorded in both annual premiums (+0.9%) as well as single premiums (+11.2%). With a market share of 8%, AXA is one of the leading life insurers in Switzerland (market share group llfe 5%, market share individual life 13%).

Business performance, full-time equivalent employees and risk assessment

Despite a challenging market environment AXA Life Ltd was able to sustain its net profit at the prior year level of CHF 298 million.

Gross premiums grew by CHF 42 million (+2.4%) to CHF 1,787 million in 2022. The increase resulted on the one hand from the group life business, mainly due to the favourable new business. The individual life segment on the other hand also increased thanks to the innovative «SmartFlex» product.

In 2017, AXA entered the health care market with supplementary health insurance products. In the past business year, the volume increased again significantly by 32% and the customer base was further expanded to over 37,000 new clients. With its supplementary health insurance products, AXA became the first full-range provider on the Swiss life and health market.

Employees of AXA Life Ltd are under contract of AXA Insurance Ltd. Hence, no annual average of the full-time employee equivalent is disclosed.

Source: Market shares are based on the statutory gross premiums of all Swiss business units belonging to the AXA Group and the market estimation by the Swiss Insurance Association (SIA) of 31° January 2023.

AXA Life Ltd has performed a risk assessment in compliance with current regulatory and professional standards as outlined in Note 2 to the financial statements.

Sustainability in asset management

As an insurer and asset manager we are aware of our environmental, social and governance (ESG) responsibilities and embrace them as a whole AXA Group. As a member of various interest groups, such as UNPRI, Climate Action 100+ and Glasgow Financial Alliance for Net Zero, we are also actively and comprehensively involved in sustainable investments.

Sustainability criteria play a key role in the investment process of AXA Life Ltd. In the context of ESG standards, AXA Life Ltd evaluates risks and manages opportunities. These are consistently implemented and partially or completely exclude capital investments in certain economic sectors. In line with this approach sector-specific guidelines and business restrictions are used:

- · No tobacco production
- No companies associated with the development, production, storage or trade of outlawed weapons
- Protection of the eco-systems (e.g. no producers of palm oil, soja, cattle farms associated with the clearing of rainforests)
- Exclusion of the oil & gas sector incl. unconventional extraction methods (tar sands & shale oil, arctic drilling, fracking) except "Whitelist"
- No coal mining or coal-fired power generation companies³
- No financial investments based on agricultural commodities

In addition to compliance with ESG standards, AXA Life Ltd has set itself the goal to emit net zero greenhouse gas emissions by 2050 for the investment portfolio managed by AXA, including real estate. In an interim step, the $\rm CO_2$ emissions of the investments will be reduced by a further 20% from 2019 to 2025, having already been reduced by 31% from 2014 to 2019.

The contribution to a more sustainable future of the AXA Group and AXA Life Ltd is constantly monitored by various independent assessment institutions – for example, AXA was awarded the top rating «AAA» by MSCI ESG Research, receives the highest rating in the insurance sector in the

S&P Global Corporate Sustainability Assessment and occupies a top position in the Dow Jones Sustainability Index.

Challenges and outlook

AXA Life Ltd successfully navigates the conflicting priorities of sharply and rapidly risen interest rates, significantly higher inflation, increasing regulation, new market participants and changing customer expectations.

The company is forced by technological changes, smart data, increasing transparency requirements, new competitors and social trends (e.g. sharing economy in mobility, sustainable finance or demographic changes) to continuously adapt its business model to current circumstances. With the vision «From Payer to Partner», AXA wants to create added value beyond financial security and traditional insurance services and become even more relevant for costumers, thus enabling a positive and differentiating customer experience at all points of contact («Customer First»).

The boost in digital customer interactions experienced during the COVID-19 pandemic has been confirmed sustainably and will have a lasting impact on customer behaviour. In this regard, the investments made so far in digitalisation projects along the value chain are proving to be an important support. At the same time AXA intends to use the digital capabilities and the existing momentum to become even simpler and more accessible for our customers.

AXA already counts 900,000 registrations on its digital insurance portal «myAXA». The high usage of the hybrid channel offering confirms the relevance of our omnichannel strategy, which combines the densest distribution network in Switzerland with new digital opportunities.

2022 was an eventful year for the occupational benefits business in Switzerland. The turnaround in interest rates and the ensuing developments of the capital markets were challenging for the pension funds. The average coverage ratio of the AXA collective foundations decreased accordingly. However, AXA's semi-autonomous collective foundations were able to pay a more than CHF 1 billion higher investment return to policyholders since their transformation in 2019 till the end of 2022, than the minimum interest rate common in full insurance solutions

² currently 13 companies

turnover more than 30% / complete exit of the coal industry by 2030 for OECD-Countries and Europe / 2040 world wide

would have been possible. In 2022 the group life business of AXA recognized more than CHF 650 million in new business, which is the second-best year in its history. Thanks to the structurally good risk capacity of the AXA collective foundations, the holistic range of products and the trustworthy brand «AXA» we were able to serve our customers optimally.

In individual life AXA is offering attractive products, which combine capital protection and interesting return potential through market leading investment fund solutions. With the new product generation «SmartFlex», AXA offers an attractive pension solution with high customer value, which creates a customer experience through intuitive and new self-services, that is comparable to that of a purely digital pension provider. AXA is also differentiating itself through its insurance portal, which provides holistic transparency over all three pillars. Moreover, with «Easy-Invest» AXA successfully entered the private asset management market.

As part of its corporate strategy, AXA also increasingly developed new services in cooperation with various start-up partners in 2022, that go beyond classic insurance coverage. With «WeCare» AXA launched a service which covers health advisory, the introduction of preventive measures along with assistance in reintegration of employees. The path of reinforced cooperation with start-ups will be maintained in the future.

Notes to the financial statements

1 Principles of accounting

The financial statement covers all the minimum requirements in line with the Swiss Code of Obligations (CO). Zero and negative messages are not listed.

The following are the most important accounting principles for AXA Life Ltd.

Basis for accounting

The financial statements for AXA Life Ltd are prepared in accordance with the CO and relevant insurance legislation. The financial year ends on December 31. All figures have been rounded individually.

Investments

The various investment positions are valued separately.

Real estate is valued at the purchase price, net of any provisions for impairment based on a lower close to the market price.

Participations are valued at the purchase price, net of any provisions for impairment based on a sustainable lower market price.

Fixed income securities are valued no higher than according to the scientific amortized cost method. Credit risks are taken into account by means of allowance.

Loans are reported at amortized cost. Mortgages are reported at nominal value. Credit risks are taken into account by means of allowance.

Equity securities and other investments (except asset backed securities) are carried at the lower of cost or market value (LOCOM). Asset backed securities are valued no higher than according to the scientific amortized cost method. For the hybrid Individual Life product "Smart Flex" the investment funds assets of the safety capital are carried at LOCOM, while those of the return-oriented capital are valued at fair value.

Investments from unit-linked business

Investments from unit-linked business are valued at fair value with gains and losses recorded in the statement of income.

Receivables and liabilities from derivatives

Receivables and liabilities from derivatives are reported at fair value with gains and losses recorded in the statement of income.

Deferred acquisition costs

A part of the costs incurred from the acquisition of new insurance contracts are capitalized and amortized over the expected life of the contracts. This applies to individual life products sold in Switzerland beginning in the year 2000.

Single-investor funds

Investments held by single-investor funds are classified directly in the respective balance sheet investment categories, in accordance with article 110 of the Insurance Supervision Ordinance (AVO).

Technical provisions

Technical provisions are determined in such a way that the liabilities for policyholders and the beneficiaries will be sufficient to cover future obligations. The calculation formulae are fixed in the business plan and have been approved by the supervisory authorities.

Non technical provisions

The non technical provisions are recognized at nominal value.

Foreign currency translation

Participations are measured at historical exchange rates; any other balance sheet items requiring translation are measured at closing rates at balance sheet date.

Transactions in the income statement are recorded at current exchange rates. Foreign exchange rate impacts are recognized in the income statement.

2 Risk management and internal control system

Risk management

AXA Life Ltd manages risks employing a three tier approach, with the first tier relying on risk owners in our lines of business, while the second and third tiers are centralized in dedicated risk management functions, and assurance functions, respectively. The local risk policy specifies these comprehensive activities, and defines the various risk measurement, management processes and governance structures across the three tiers and for quantifiable risks (such as insurance, market or credit risks) and other risk categories. AXA Life Ltd takes as its premier risk management objectives the defense of its financial strength and reputation, and the safeguarding policyholders' and shareholders' interests. Of specific importance in this respect is the compliance with regulatory capital under Swiss Solvency Test (SST). The SST, which is embedded in the risk indicators framework, is performed with a standard model.

Risk assessment

Within AXA Life Ltd various risk assessments are being conducted. The Executive Board has performed a comprehensive, structured risk assessment in fall 2022. Based on risk assessments provided by risk control functions, the Executive Board has discussed the risk situation and defined the key risks. The Board of Directors has taken note of the results of the Executive Board's risk assessment. Updates of the risk profile are reflected in risk reports, presented to the Audit and Risk Management Committee and the Risk Committee.

Internal control system

AXA Life Ltd's internal control system, related to the categories of objective financial reporting, operations, and compliance, contains internally defined, performed and documented procedures, methods and tools that serve to identify and assess risks, to define controls for relevant risks and to perform these controls.

Winterthur, April 20, 2023

On behalf of the Board of Directors and the Executive Board

Antimo Perretta Chairman of the Board Fabrizio Petrillo Chief Executive Officer

Report of the statutory auditor to the General Meeting on the financial statements 2022

Report on the audit of the financial statements

Opinion

We have audited the financial statements of AXA Life Ltd (the Company), which comprise the statement of financial position as at 31. December 2022 and the statement of income and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements (pages 9 - 23) comply with Swiss law and the Company's articles of incorporation.

Basis for opinion

We conducted our audit in accordance with Swiss law and Swiss Standards on Auditing (SA-CH). Our responsibilities under those provisions and standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Company in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other matter

The financial statements for the year ended 31 December 2021 were audited by another statutory auditor (PricewaterhouseCoopers Ltd, Zurich und Mazars Ltd, Zurich) who expressed an unmodified opinion on those financial statements on April 14, 2022.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our

knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Board of Directors' responsibilities for the financial statements

The Board of Directors is responsible for the preparation of the financial statements in accordance with the provisions of Swiss law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and SA-CH will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on EXPERTsuisse's website at: https://www.expertsuisse.ch/en/audit-report. This description forms an integral part of our report.

Report on other legal and regulatory requirements

In accordance with Art. 728a para. 1 item 3 CO and PS-CH 890, we confirm that an internal control system exists, which has been designed for the preparation of the financial statements according to the instructions of the Board of Directors.

Furthermore, we confirm that the proposed appropriation of available earnings complies with Swiss law and the Company's articles of incorporation. We recommend that the financial statements submitted to you be approved.
